

GENDER AND HIV IN MARYLAND, 2014

SEPTEMBER 2016

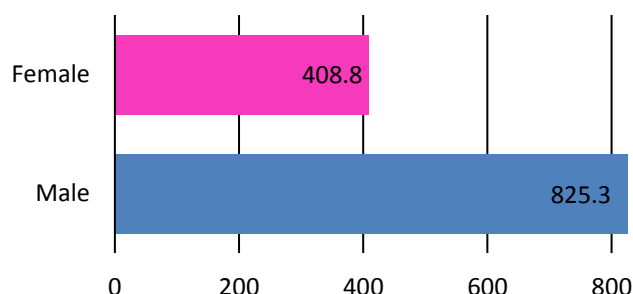

**Living Adult/Adolescent Maryland HIV Cases
12/31/2014 (N=30,463)**

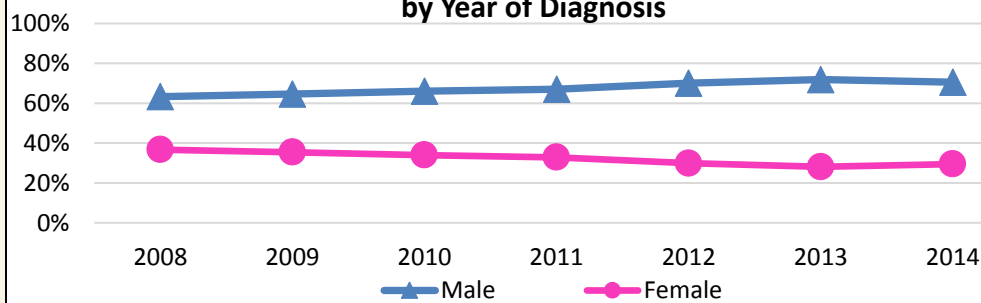

- There are almost **twice** as many **males** with HIV as females (**65% vs. 35%**).
- **Males** are **twice** as likely to have HIV as females. Among living adult/adolescent cases of HIV in Maryland there were **825.3 cases per 100,000 males** and **408.8 cases per 100,000 females**.

- **Transgender persons** account for roughly one percent of all HIV cases, however, there is likely to be incomplete reporting of transgender status and studies have shown high rates of HIV in transgender people.
- A 2004-5 survey of **84 transgender persons** in Baltimore measured HIV rates of **40%, 17 times higher** than the **2%** rate for all adults/adolescents in Baltimore City.

**Living Adult/Adolescent Maryland HIV Cases
per 100,000 Population, 12/31/2014**

**Adult/Adolescent Maryland HIV Diagnoses
by Year of Diagnosis**

- The proportion of new HIV diagnoses that were **male increased** from **64.6%** in 2008 to **70.8%** in 2014. **Females decreased** from **35.4%** in 2008 to **29.2%** in 2014.
